Assistant professor- University of Blida, Algeria

To whom it may concern

Dear Sir – Madame

I have the honor of submitting the attached article “THE HOMOTOPY EXACT SEQUENCE OF A PAIR OF GRAPHS” for publication. We have proved (and constructed) that a long exact sequence of homotopy is associated to every pair (G,H) of graphs. This is the main property of any consistent homotopy theory. Some applications to the sphere graphs are given.

Best regards.

Doctor Mohamed El Amine Talbi – university of Blida
